Using the recent Command Reference for setup of itemization.
It reads: `\setupitemize[...,...][...,...][..,..=..,..]`
inherits from: `\setupitemgroup[...,...][..,..=..,..]`
and: `\startitemize[...,...][..,..=..,..]`

Not everything is in working order below. What is/am I doing wrong?

`\setupitemgroup[itemize][][3,joinedup,packed][color=blue,inbetween=]`
No options functioning:

- first

- second

`\setupitemize[][3,joinedup,packed][color=blue,inbetween=]`
No options functioning:

- first

- second

`\startitemize[3,joinedup,packed][color=blue,inbetween=]`
Everything called for functioning:
⋆ first
⋆ second
