1. Solve the following linear equations.

    i. equation

   ii. equation

    iii. equation
    iv. equation

    v. equation

2. Draw the graph of the following linear function.

    i. $2x + 3y = 6$

    ii. $y = 2x - 1$

3. Find the formula of the line 1:

4. Find the formula of the line 2:
